

ABSTRACT OF THE DISCLOSURE

On an information recording medium, there are recorded: one
or a plurality of first entity information (VTS), which is compressed
5 and encoded by a first compressing and encoding method, for
individually constituting Titles; first management information
(VMG) for managing and controlling the first entity information; one
or a plurality of second entity information (VTS2), which is
compressed and encoded by a second compressing and encoding
10 method, for individually constituting Titles; and second management
information (VMG2) for managing and controlling the first and
second entity information.
